

LET US HELP WITH ALL YOUR MACHINING NEEDS

UWS MACHINING

Universal Wellhead Services has in-house machining capabilities available 24/7 in our Newcomerstown, OH, location, allowing us to quickly and efficiently repair wellheads, as well as all types of different oilfield equipment.

UWS specializes in the repair and remanufacture of all wellhead and gate valve equipment. UWS will cut all parts and connections, and all items are repaired and restored to API 6A specs and are fully warranted for 1 year.

Additionally, UWS' proprietary Inventory Management System allows the ability to maintain customer inventory, maximizing usage of customer property, and providing detailed and real-time inventory reports.
